

How your money changes lives

Alzheimer's Society is the only UK charity that funds research to find a cure, campaigns for change and supports people living with dementia today.

Support

Our wide range of support services strive to ensure nobody should have to face dementia alone.

Society

We will fight for a future where nobody affected by dementia is excluded from their community or denied the care and support they deserve.

Research

We are investing £150 million over the next decade into dementia research. We fund a variety of projects across the UK to help improve care, and work towards a cure.

£50 supplies our hero scientists with 312 microscope slides, essential in spotting changes that happen in the brain.

£100 allows our trained Dementia Advisers to answer ten calls for help from people who are struggling.

£400 could help us to deliver eight Singing for the Brain sessions for a month, giving people affected by dementia opportunities to stay connected with one another through the power of song.
