

Your money changes lives.

Alzheimer's Society is the only UK charity that funds research, campaigns for change and supports people living with dementia today.

Louise's mum Marion, 72, was diagnosed with Dementia with Lewy Bodies in March 2020. "Mum's diagnosis came over the phone at the beginning of the first lockdown. Since then, my life has completely changed, and it feels quite lonely – caring for Mum is 24/7 with no days off.

'In the absence of any other help following her diagnosis, I phoned Alzheimer's Society. I was given a Dementia Support Worker. If I'd had her right away, it would have been so different. If I'm not sure about anything I can ring her. I didn't know anything about the benefits system, but they told me about attendance allowance and supported me with filling out the forms. They have been brilliant and very supportive. It's been a really nice partnership, one which I am extremely grateful for"

Because of you, we can be there for people like Louise and Marion when they need it most.

£50 supplies 134 uses of DNA duplicator in our research. This allows small samples of DNA to be copied into larger samples for study. Understanding our genes is vital to understanding the causes of dementia.

£100 provides expert face-to-face support for families dealing with the challenges of dementia. Whether they're supporting someone living with dementia, a carer, or an entire family, this support is invaluable.

£400 hosts five Dementia Voice group sessions. Each experience of dementia is different. That's why it's so important to listen to the people living with it. This ensures we can support everyone in the way they deserve.
